

Apendo bjuder in till Bluemix Workshop med Cognitive Computing

När: 9 februari, 2017, kl 13:00-17:00

Var: Grönborgs, Storgatan 73,
852 30 Sundsvall

Agenda

- Fika och mingel
- Kort presentation på ca 30-40 minuter om varför det är viktigt med innovation, agila arbetsmetoder. Sedan går vi in på vad Bluemix är och hur det kan användas tillsammans med IBMs kognitiva tjänster för att lösa affärsutmaningar. Vi trycker på områden som innovation, agila arbetsmetoder, snabb prototypframtagning och att skapa värde.
- Hands-on övningar med tydliga steg för steg instruktioner för att skapa några enkla applikationer med kognitiva element.
- Summering, återkoppling från deltagarna och eventuella frågor.

Anmälan per mail till:

marcus.norberg@apendo.se

För eventuella frågor kring IBM Bluemix eller kring själva workshopen, var god kontakta

Hjärtligt välkommen!

IBM Bluemix™

Are you a freelance developer working for multiple clients? Or developing the next start-up killer app? Or working on appealing web and mobile front-end applications, to be integrated with your enterprise's back-end applications? Do you want an environment to build an application quickly, without worrying about the underlying IT infrastructure? Or do you have a need for extending your existing IT infrastructure in the cloud?

IBM Bluemix is what you need!

It is an open-standards, cloud based, innovation platform for building, running and managing applications. Developers have access to a broad portfolio of capabilities and re-useable services — IBM, open source and 3rd party — across DevOps, Big Data and Analytics, mobile and security. It helps you to rapidly stitch together new applications, at lower cost. You will learn as well to build cognitive applications, using Watson Services in Bluemix. This will be a great way to turt your imagination as to what cognitive services could be used for.

The content of the session (morning and afternoon sessions have the same content) is the following:

- What is Bluemix cognitive computing
- Why Bluemix cognitive computing
- How to access our cognitive services
- Bluemix + micro services
- Reference cases
- Build your first cognitive application
